

1. 각 문제의 출력 결과를 적으세요.

- 1) `System.out.println("a" + " b");`
- 2) `System.out.println(1 * 3 + 2);`
- 3) `System.out.println("abc" + 1 + "ed");`
- 4) `System.out.println(3 + 5 + "abc" + 1);`
- 5) `System.out.println(1 + "2" + 3);`
- 6) `System.out.println("1" + (2 + 3));`
- 7)

```
public static void main(String[] ar){
    int a = 10;
    int b = 20;
    System.out.println("a + b = " + (a + b));
    System.out.println("a + b = " + a + b);
}
```

8)

```
public static void main(String[] ar){
    int a = 10;
    int b = 20;
    int c = b - a;
    System.out.println(a + " + " + b + " = " + c);
}
```

8)

```
public static void main(String[] ar){
    int a;
    System.out.println("a = " + a);
}
```

9)

```
public static void main(String[] ar){
    int a = 10;
    int b = 20;
    System.out.print("a + b = ");
    System.out.print(a + b);
}
```
